Available for remote roles worldwide

## PROFESSIONAL SUMMARY

Results-driven Senior Full-Stack Engineer and Head of IT with a strong foundation in software architecture, enterprise application development, and IT leadership. Specialist in the MERN stack, TypeScript, Docker, CI/CD pipelines, real-time systems, and secure API design. Proven ability to architect and deliver complex ERP systems from the ground up, lead engineering teams, and translate business requirements into scalable technical solutions. Holds a B.Eng in Electronics & Control Systems from Liverpool John Moores University and is certified by the Computer Professionals Registration Council of Nigeria (CPN) at NSQ Level 3 in both Backend and Frontend Web Development. Actively seeking remote full-stack or IT leadership roles.

## TECHNICAL SKILLS

|                               |                                                                        |
|-------------------------------|------------------------------------------------------------------------|
| <b>Languages:</b>             | JavaScript (ES6+), TypeScript                                          |
| <b>Backend:</b>               | Node.js, Express.js, REST APIs, JWT Authentication, RBAC, Socket.IO    |
| <b>Frontend &amp; Mobile:</b> | React, Redux Toolkit, React Native, Tailwind CSS, HTML5, CSS3          |
| <b>Databases:</b>             | MongoDB, Mongoose ODM, MySQL, PostgreSQL                               |
| <b>DevOps &amp; Tools:</b>    | Docker, CI/CD pipelines, Git, GitHub, Vercel, Postman, VS Code         |
| <b>Automation:</b>            | PDF generation, Excel automation, automated email workflows            |
| <b>Architecture:</b>          | ERP systems design, Agile, microservices, API structuring, SDLC        |
| <b>Infrastructure:</b>        | Network configuration, IT systems setup, hardware management           |
| <b>Soft Skills:</b>           | Team leadership, mentorship, stakeholder communication, staff training |

## PROFESSIONAL EXPERIENCE

### Head of IT / Lead Full-Stack Engineer | Newpal Nigeria Limited (Remote) *Dec 2024 – Present*

Leading the full IT and software development function for an agro-processing enterprise operating a 120 MT/day milling plant and large-scale contract farming programme across 18,000 hectares.

- Architected and delivered a bespoke ERP system from the ground up, covering production management, employee dashboards, accounting, and Nigerian tax compliance modules
- Designed and secured backend APIs using Node.js, Express.js, MongoDB, and JWT-based authentication with role-based access control (RBAC)
- Implemented real-time operational dashboards and notifications using Socket.IO, significantly improving management visibility across the factory floor
- Built automated PDF and Excel reporting pipelines, eliminating manual data entry and reducing reporting time significantly
- Developed a modern React/Redux Toolkit admin interface with Tailwind CSS, containerised with Docker and deployed via CI/CD pipeline
- Collaborated directly with executive management to translate complex operational requirements into scalable software architecture

### Full-Stack Developer & Software Architect | Sonatech Global (Remote) *May 2024 – Nov 2024*

Delivered enterprise-grade web applications for a global technology company, working across the full MERN stack lifecycle from architecture through to deployment.

- Designed and built multiple enterprise web applications from requirements through to deployment using MongoDB, Express, React, and Node.js
- Designed, built and manages the company's live website — sonatechglobal.com — demonstrating full ownership from development to production deployment
- Led architecture planning sessions, establishing API structuring standards and CI/CD practices adopted across the engineering team
- Mentored junior and mid-level developers, conducting code reviews and embedding engineering best practices
- Improved application response times through database query optimisation and caching strategies

## Freelance Web Developer | Self-Employed (Remote)

2023 – Apr 2024

Undertook independent client projects and professional development between roles.

- Designed and developed client websites and web applications using React, TypeScript, Node.js, HTML5 and CSS3
- Completed advanced Web Development and Web3 training through London App Brewery, expanding blockchain and decentralised application skills
- Built and published personal and open-source projects on GitHub, available at [github.com/amazingprincelee](https://github.com/amazingprincelee)

## EDUCATION & CERTIFICATIONS

---

**B.Eng Electronics & Control Systems** | [Liverpool John Moores University, UK](#)

2013

**Advanced Diploma, Electrical & Electronics Engineering** | [Institut Megatech, Malaysia](#)

2009

### Professional Certifications:

- NSQ Level 3 – Backend Web Development (Computer Professionals Registration Council of Nigeria – CPN)
- NSQ Level 3 – Frontend Web Development (Computer Professionals Registration Council of Nigeria – CPN)
- Web Development & Web3 – London App Brewery

## KEY PROJECTS

---

- Newpal ERP Platform — End-to-end enterprise resource planning system covering production management, HR, finance, and compliance. Built solo as lead architect and developer. Live at [erp-newpal.com](https://erp-newpal.com)
- Sonatech Global Website — Designed, built and manages the live company website for a global tech firm. Live at [sanatechglobal.com](https://sanatechglobal.com)
- Real-Time Factory Dashboard — Socket.IO driven operational monitoring system for a 120 MT/day industrial milling facility, with live alerts and management reporting
